Background

The Gotcha!™ strap was born out of the owner's need for a convenient fastening device for the stays on his Catamaran whilst transporting it to and from the beach. After experimenting with a few hand made designs, it became apparent that there were many uses for the Gotcha!™. The Bungee cords and toggles have now gone and the Gotcha!™ straps are used in various ways on the Cat, from holding the stays and mainsheets etc to the boom during transport, strapping the sail to the boom when pulled down to wrapping the sail up with the 1 metre Gotcha!™ when sailing is over for the day.

Testimonial

Pete Whiteley – experienced sailor and Managing Director of More Days Sailing Limited Auckland says “I have found the Gotcha!™ strap to be a most useful accessory on my yacht. Not only does it enable me to tie the sails down in seconds, but all stays and any loose equipment are quickly secured to prevent them being lost overboard or flapping about dangerously”.
